

EarthWatch

A new era in accessing geospatial information

Easily find and consume the imagery you need for your specific use case. EarthWatch is the industry's premier usage-based subscription service for up-to-date Very High Resolution satellite imagery. With one subscription, you get global access to the most current content and 6 billion square kilometers of images. EarthWatch's flexibility is ideal for a wide range of geospatial applications such as countrywide land administration and mapping, energy projects, asset and facility monitoring, humanitarian and disaster response, and more.

GLOBAL COVERAGE

There are no geographical restrictions. You define your areas of interest from our available global coverage including more than 6,000 world capitals and metropolitan areas in 30 cm resolution.

PREMIUM IMAGERY

Access the highest quality imagery in resolution, accuracy, and currency. View a highly aesthetic mosaic or see change over time with access to our historical archive.

SUBSCRIPTION PRICING

Pay only for what you use, view or download.

CLOUD ACCESS

Search and download/stream the data you need, when you need it; easily share with others in your organisation or integrate into your existing workflow and applications.

Features

- Up to 30 cm resolution imagery, the industry's highest standard
- View and download imagery within 48 hours of acquisition
- Key metadata provided with imagery
- Time-lapse archive enables change detection
- Downloadable true and false colour, orthorectified image strips and mosaics for offline use
- Subscribe to your area(s) of interest
- Connect with ESRI ArcMap and other GIS tools
- Usage-based subscription – subscribe to what you need

Benefits

- Make decisions quickly with the most accurate and recent information
- Leverage all publicly available collections from the WorldView constellation at varying resolutions
- Increase efficiency by monitoring new acquisitions over your areas of interest
- Reduce tasking costs and traditional order processing time with off-the-shelf availability
- Eliminate the time needed to search for, procure and manipulate data
- On-demand access via the GIS tool of your choice to extract the information you need
- Pay only for what you use

Access and Functionality

EarthWatch Browser App: is an easy-to-use browser interface that allows you to quickly search and view all premium content. This intuitive user interface enables you to easily manage and download high-value multi-temporal content as well as identify features over the image of your choice.

API: Imagery and metadata are accessible through a full suite of OGC-standard web services (WMS, WMTS, WFS, WCS), simplifying the discovery, download, integration and analysis of high-resolution satellite imagery.

About European Space Imaging

Based in Munich, Germany and established in 2002, European Space Imaging is the leading premium supplier of global very high resolution (VHR) satellite imagery and derived services to customers in Europe and North Africa.

With over 17 years' experience, European Space Imaging has developed a reputation for expert and personalised customer service and an unbeatable track record for supplying tailored very high resolution imagery solutions to meet the diverse projects and requirements of their customers.

Furthermore, European Space Imaging is the only European satellite data provider to supply imagery at true 30 cm resolution and who own and operate its own multi-mission ground station for direct satellite tasking and local data downlink.
