

AEUSI

ATOM

DIRECT SATELLITE
TASKING IN 60 SECONDS
VIA WEB OR API

WHAT IS ATOM?

- Advanced platform for direct tasking, archive ordering and project management
- Granular control over search filters, product parameters and tasking settings
- Real-time, accurate feasibility studies
- NOT just another aggregator web app

24/7 AUTOMATED
ORDERING, PROCESSING,
& DELIVERY

ADVANCED ORDER
MANAGEMENT FOR
USERS & RESELLERS

LIVE FEASIBILITY

This is more than just a simple display of satellite access. Our Live Feasibility technology analyzes 75+ key factors to deliver real-time, highly accurate predictions.

Reliable data, faster decisions – No other tasking platform on the market offers such a comprehensive and precise feasibility analysis.

**WEATHER
FACTOR**

**RISK
FACTOR**

**ORDER
CONFLICTS**

**ORBITAL
MECHANICS**

KEY FEATURES WHY CHOOSE ATOM

**Automated Monitoring
& Scheduling**

**Flexible Payment
Solutions**

**Advance User and
Admin Controls**

**Customizable
Production & Delivery**

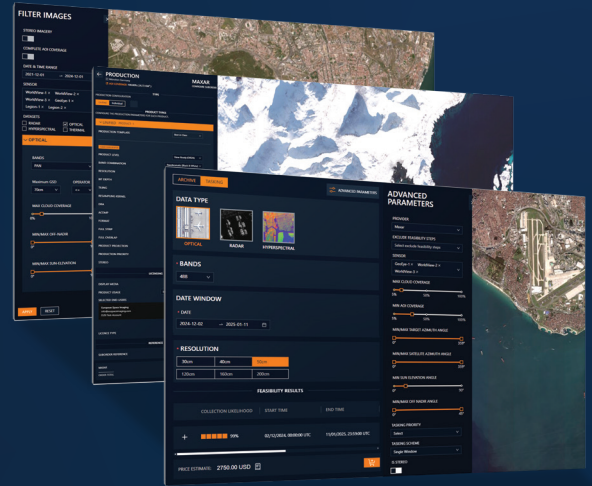

**Project & Workflow
Managment**

**Future-Ready Data
integrations**

TASKING LIVE FEASIBILITY

This is more than just a simple display of satellite access. Our Live Feasibility technology analyzes 75+ key factors—from weather modeling to orbital geometry—to deliver real-time, highly accurate predictions.

Reliable data, faster decisions – No other tasking platform on the market offers such a comprehensive and precise feasibility analysis.

KEY FEATURES WHY CHOOSE ATOM

Automated Monitoring & Scheduling

The ability to schedule image collection at set intervals within a defined date range

Flexible Payment Solutions

Direct online payment, invoicing, or pre-paid credits

Advance User and Admin Controls

They can be tailored to different organizational structures.

Customizable Production & Delivery

The parameters can be customized to fit contractual term.

Project & Workflow Management

Projects, folders, alerts and order management tools to fit various use cases

Future-Ready Data integrations

Future integration of other datasets (Umbra, Pixxel, etc).

ATOM VS TARA

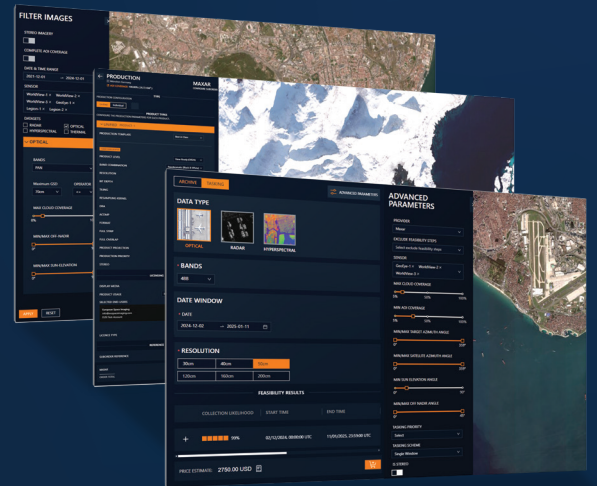

TARA is the API that customers can use to integrate the service into their own applications, while ATOM is the actual web app that can be accessed via web.
